While paying up to 50 CZK, almost 6 of 10 Czechs prefer cash payment. For more expensive purchases, Czechs prefer to pay using electronic methods, especially for purchases above 1000 CZK.

# Czechs use both cash and plastic card payment very often.

They mostly use cash when other methods are unavailable.

The most important reason for choosing card is comfort and time saving.

# ATTITUDES TOWARDS MONEY

The basic module of our research on Attitudes towards forms of payment is a standardized psychological tool created by Professor Grażyna Wąsowicz, who specializes in the field of economic psychology, in particular the psychology of money.

The Money Relationship Questionnaire (KSP-33) (Wąsowicz-Kiryło, 2013) is a standardized tool with proven reliability and validity. It consists of 33 statements that allow measurement on 9 scales.

### THREE SCALES MEASURE ATTITUDES TOWARDS MONEY

# HOW OFTEN DO YOU FIND YOURSELF IN SITUATIONS WHERE YOU WANT TO PAY BY CARD (e.g. plastic payment card, payment card connected to phone) BUT CAN'T?

#### RECALL THE LAST SITUATION WHEN YOU WANTED TO PAY BY CARD BUT COULDN'T. What was the reason why you couldn't pay by card?

Situations where there is no possibility to pay by card are almost as frequent in Czechia as in other countries covered by the research – a few more Czechs declare that such situations happen about once a week.

The main reason for these situations is that payment cards have not been accepted – this percentage is higher compared to other countries (40% vs. 30%).

# NO POSSIBILITY OF PAYMENT DUE TO LACK OF CASH AND NO POSSIBILITY TO CASH-FREE PAYMENT

Czechs most often have problems with shopping or using a service because they do not have enough cash on them when they do grocery or other shopping, pay at restaurants, markets and bazaars, or pay parking fees.

They least often indicate such difficulties in case of services that they do not use at all or use rarely, such as home repairs, purchase of software or electronic games, and school fees.
